

# Joy Debnath

## Full Stack Developer (Frontend-Focused)

**Mobile:** 01740-036543

**Email:** developerjoydebnath@gmail.com

**GitHub:** <https://github.com/developerjoydebnath>

**Address:** Road No 4, Block-D, Banasree, Dhaka-1219

## Career Objective

To contribute to real-world projects while enhancing my skills, collaborating with teams, turning designs into responsive, user-friendly interfaces, and integrating APIs. I aim to gain professional experience that adds value to my team and supports broader project goals.

## Education

### B.Sc. in Physics

Honours (Final Year)

Tongi Govt. College, Tongi, Gazipur

## Technical Skills

### Programming Languages

- HTML5, CSS3, JavaScript (ES6+), TypeScript

### Frontend Frameworks & Libraries

- React.js, Next.js, Redux, RTK Query, GraphQL, React Query, Zustand, Axios, SWR
- Tailwind CSS, Bootstrap, Material UI, Chakra UI, ShadCN UI
- Framer Motion, GSAP (Animations)

### Backend Technologies

- Node.js, Express.js, NestJS
- Socket.io
- PHP, Laravel
- Prisma ORM

### Databases

- MongoDB, MySQL, PostgreSQL, Firebase, Supabase

### UI/UX Design

- Figma

## Operating Systems

- Linux, Windows

## Professional Experience

### Frontend Developer (Part-Time)

Afritech54 (USA)

July 2025 – February 2026

#### Role & Responsibilities:

- Developing and maintaining modern frontend applications using **React.js** and **Next.js**.
- Collaborating with international teams to translate business requirements into scalable UI solutions.
- Implementing reusable components and ensuring consistent UI/UX across projects.
- Optimizing frontend performance and improving application responsiveness.

### Full Stack Developer (Frontend Focused)

Plexus Cloud (Dhaka, Bangladesh)

January 2024 – Present

Worked on large-scale **ERP, CRM, ISP Billing, and Transmission systems**, contributing primarily as a **Frontend Specialist with Full Stack exposure**.

#### EDCNMS (Network Monitoring System) – Government Project

**Client:** Department of ICT (DoICT)

**Role:** Full Stack Developer (Frontend Lead)

**Tech Stack:** Next.js, Tailwind CSS, ShadCN UI, Axios, SWR, Laravel, MySQL, Redis, Socket.io, GenACS

#### Overview:

Worked on a nationwide **Network Monitoring System (NMS)** supporting a government initiative that provides **free internet access to 100,000+ institutions** across the country. The platform manages all operational, administrative, and support workflows through a **fully permission-based architecture**.

#### Key Contributions:

- Designed and developed the **entire frontend independently**, delivering a scalable and user-friendly interface.
- Contributed to approximately **50% of backend development**, collaborating closely with the backend team.
- Implemented a **permission-based system** with **10 distinct user roles**, ensuring strict access control.

- Built core modules including **institution internet management, ticketing system, and administrator/employee hierarchy management.**
- Integrated **real-time updates** and optimized performance for large-scale operational data.
- Integrated live and historical bandwidth graph and seamless report generation.

### ERP System Development

- Played a key role in enhancing an existing **enterprise-level ERP system.**
- Optimized frontend performance for faster load times and smoother user interactions.
- Implemented new modules and features based on business requirements.
- Gained extensive experience in **permission-based and role-based access control** systems.
- Worked deeply with **map integrations** to visualize operational and location-based data.

### ISP Billing System

- Designed and Developed a comprehensive **ISP Billing System** with **role-based and commission-based workflows.**
- Built interfaces for managing **corporate clients, agents, sub-agents,** and commission calculations.
- Integrated **Mikrotik router APIs** to enable real-time user activation and deactivation.
- Ensured accurate billing flows and smooth operational control through intuitive dashboards.

### Transmission & Routing System

- Designed and developed a **map-based transmission routing system** connecting branches and end-users.
- Implemented **multi-layer map visualizations** for efficient route planning and monitoring.
- Improved system usability by delivering clean, interactive, and data-driven UI components.

### Key Contributions:

- Specialized in building **complex, data-heavy frontend interfaces.**
- Focused on **performance optimization and UI scalability.**
- Collaborated closely with backend developers, designers, and product teams.
- Gained strong expertise in **maps, routing logic, and geospatial visualization.**
- Gained strong expertise in **Role and Access** based data control.

**Note:** My role involved working on specific modules/pages within large systems while collaborating with cross-functional teams, contributing to ERP, CRM, ISP Billing, and Transmission software solutions.

## Recent Works

- **Akik Cadcam Prosthetics PMS – Dental Practise Management System**

**Tech Stack:** React.js, TypeScript, Tailwind CSS, Inertia, Laravel

<https://pms.akikcadcamprosthetics.com>

**Role:** Frontend Developer

**Description:**

Built a Dental Practice Management System to manage patients, appointments, prescriptions, and treatment records. Created dashboards for reports and income/expense tracking with a strong focus on usability and clean UI.

- **Horizon Welfare – Welfare Organization Platform**

**Tech Stack:** Next.js, TypeScript, Tailwind CSS, ShadCN UI, NextAuth, Laravel, MySQL

<https://horizonwelfare.org>

**Role:** Full Stack Developer

**Description:**

Built a full-featured welfare organization platform with authentication, role-based access, and dynamic content management (CMS). Delivered a modern, accessible UI while ensuring secure authentication and scalable backend integration.

- **Akik Cadcam Prosthetics – Dental Portfolio**

**Tech Stack:** React.js, TypeScript, Tailwind CSS, Inertia, Laravel

<https://akikcadcamprosthetics.com>

**Role:** Frontend Developer

**Description:**

Built a professional dental portfolio website emphasizing clean UI, performance, and responsiveness to showcase services and expertise effectively.

- **Numan Trading Corporation – Corporate Trading Company**

**Tech Stack:** ReactJS, TypeScript, TailwindCSS, ShadCN UI, Laravel, MySQL

<https://numan-trading-frontend.vercel.app>

<https://numantrading.com> (Live Soon)

**Role:** Full Stack Developer

**Description:**

Developed a corporate trading website with product management and scalable architecture. Focused on clean design, responsive layout, and smooth backend integration.

- **Elite Match Africa & Model Match Africa – Matchmaking Platform**

**Tech Stack:** Next.js, TypeScript, Tailwind CSS, ShadCN UI, NestJS, MySQL

<https://elitematchafrica.com>

<https://modelmatchafrica.com>

**Role:** Frontend-Focused Full Stack Developer

**Description:**

Built a modern matchmaking platform with clean UI, secure authentication, and a dedicated admin panel. Focused on performance, accessibility, and smooth user experience.

- **StackRover Agency Portfolio – IT Agency Portfolio**

**Tech Stack:** Next.js, TypeScript, Tailwind CSS, ShadCN UI

<https://stackrover-landing-v1.vercel.app>

**Role:** Frontend Developer

**Description:**

Created a modern agency landing page with a strong focus on UI aesthetics, animations, and performance optimization to attract potential clients.

- **Sidratulnoor – E-Commerce Platform**

**Tech Stack:** ReactJS, TypeScript, Tailwind CSS, ShadCN UI, GoLang, Postgres

<https://sidratulnoor.com>

**Role:** Frontend Developer

**Description:**

Worked on a single-vendor eCommerce site, building clean and responsive UI for smooth product browsing and ordering

## **Closing Statement**

I am passionate about building scalable, high-quality web applications and continuously improving my skills. I thrive in collaborative environments and enjoy solving complex problems through clean, efficient, and user-centric solutions.

**Thank you for considering my application.**
