1. Executive Summary

This Document outlines the complete development plan for the Nexa Furniture E-Commerce Platform - a modern, professional online store where your customer can browse products, place orders, and make secure payments, while you manage everything from a powerful Admin Dashboard.

The platform is built with **React** (customer-facing website) and **Node.js** (back-end server) - industry leading technologies used by thousands of successful online stores worldwide.

■	Full Online Store	■ ■	Admin Dashboard
■	Order Management	■	Courier Integration
■	Payment Gateway	■	Settings

2. Storefront- What Your Customers Will See

Everything your shoppers need for a smooth, enjoyable buying experience:

■	Product Listing Page A beautiful, searchable gallery of all your furniture products with filters by category, price and style
■	Product Details Page Full product page with high-quality images, description, dimensions, pricing, and add-to-card button.
■	Like & Comment System Customers can like products and leave reviews/comments, building trust and social proof for your brand.
■	Payment Method Secure online payment integration so customers can pay safely by card, mobile banking, or other methods.
■	Cart System A smooth shopping cart where customers can add/remove items, update quantities, and proceed to checkout.
■	About Us & Contact Us Professional pages that tell your brand story and give customers easy ways to reach you.

3. Admin Dashboard – Your Control Center

A private, password-protected area where you and your team manage the entire business:

■	Dashboard Overview See sales totals, new orders, top products, and key business numbers at a glance every day.
■	Product Management (List / Create / Update / Details) Add new furniture items, edit prices & descriptions, upload photos, and remove discontinued products — no technical knowledge needed
■	Order Management View all incoming orders, update their status (Pending → Confirmed → Shipped → Delivered), and keep customers informed
■	Courier Service Integration Connect with delivery/courier partners to generate shipping labels, track packages, and manage delivery slots.
■	Payment Management Monitor all transactions, confirm payments received, and handle refunds from one central place.
■	Settings Configure store name, contact details, delivery zones, tax rates, and notification preferences.

4. Technology Used

Component	Technology
Customer Website	React.js
Server / Backend	Node.js
Database	Postgresql
Hosting	Cloud Server (VPS)
Security	HTTPS/ JWT Auth

5. Investment & Pricing

Item	Cost
Development Cost	■ 60000 TK
Server / Backend	■ 1500-2000 TK / Year
Web Hosting	■ 1500-2000 TK / Month
Third-party services Payment gateway fees, courier API, SMS/email notifications	■ As Per Bill / month

6. What You Get — At a Glance

■ Full source code The website belongs to you completely.	■ Mobile-friendly design Looks great on phones, tablets & computers.
■ Secure admin panel Only your team can access the backend.	■ Order & delivery tracking Know the status of every order in real time.
■ Payment integration Accept card/mobile payments safely.	■ Training & handover We walk you through using the admin panel.
■ Post-launch support Bug fixes and guidance after going live.	

7. Estimated Project Timeline

Phase	What Happens	Duration
Phase 1	Requirement finalization, design wireframes	1 Week
Phase 2	Storefront development (product pages, cart, payment)	2-3 Weeks
Phase 3	Admin Dashboard development	2 Weeks
Phase 4	Testing, bug fixing & client review	1 Week
Phase 5	Final deployment & training	3-5 Days
Total		~6-8 Weeks

8. Terms & Next Steps

■ Payment Terms 50% advance payment to begin development. Remaining 50% upon project completion and delivery.
■ Ownership Full source code and all assets are handed over to the client after final payment.
■ Warranty 30 days of free bug fixes after launch. Any new feature requests will be quoted separately.
■ Next Step Review this proposal, confirm features, and sign the agreement. Development starts within 2 business days of advance payment.
